

## Pacemaker Donation

ReGen is a non-profit non governmental organization focused on promoting the donation of single use medical devices and their reuse in veterinary medicine.

When a Pacemaker is removed, it ends up being eliminated as medical waste.

By donating this medical device, you will help save animal lives. ReGen is dedicated to gathering, reprocessing, cleaning and sterilizing single use medical devices. We reduced medical waste and make it easier for people to access low cost advanced veterinary life-saving therapies they might otherwise not afford.

I am the authorized legal representative of the deceased, and I agree to donate the pacemaker to ReGen. I have read and understood the information described in this form.
